just a funny book

By Orrin C. Judd

I really think that American gentlemen are the best after all, because kissing your hand may make you feel very, very good but a diamond-and-safire bracelet lasts forever. -Lorelei Lee, *Gentlemen Prefer Blondes*
Up until now, I'd figured that the most ignominious fate that a significant 20th century writer had suffered was that T. S. Eliot will be best remembered for the fact that a book of his poems inspired the musical *Cats*. Here's a worse one : Anita Loos, author of one of the funniest novels ever written, may be remembered as the author whose book inspired the musical which inspired the music video of Madonna's *Material Girl*. This after all is a book which while it was being serialized made *Harper's Bazaar* into a best-selling magazine,

went through 45 editions in 13 languages (including Chinese and Russian) upon publication, which Edith Wharton referred to as "the great American novel," which a nearly blind James Joyce chose as his preferred reading during the brief period he was allotted each day, and which won praise from readers as varied as Winston Churchill, William Faulkner, George Santayana, and Benito Mussolini.

Even before she wrote this story, Anita Loos had already established herself as a topflight Hollywood screenwriter, working with the likes of D. W. Griffith and Douglas Fairbanks, and she numbered H. L. Mencken among her many literary friends. In fact, the book is at least in part intended to poke fun at Mencken. Loos had previously noticed, with some amusement, the intellectually snobbish writer's contradictory weakness for ditzy blonde babes. So when she found herself traveling cross country on the Santa Fe Chief with her husband (the director John Emerson), Fairbanks, several other gentlemen and one blonde starlet, she was struck by the fact that the men stumbled over themselves trying to help the other woman, while Ms Loos was left to lug her own baggage:

Obviously there was some radical difference between that girl and me. But what was it? We were both in the pristine years of early youth; we were about the same degree of comeliness; as to our mental acumen, there was nothing to discuss : I was the smarter. Then why did that girl so far outdistance me in feminine allure? She was a natural blonde and I was a brunette.

Loos promptly began writing the first notes for what would become the hilarious adventures of Lorelei Lee, the flighty but conniving blonde to whom "Fate keeps on happening," and, when finished, sent them to Mencken, who was then editing *The American Mercury*.

He told her, "Little girl, you're making fun of sex, and that's never been clone before in the U.S.A.," but also suggested that she submit the story to *Harper's Bazaar*. The editor, Henry Sell, liked the initial story so much that he got her to write several more installments and serialized them in the magazine. The rest, as they say, is history...

The resulting novel reminds me a great deal of Ring Lardner's *You Know Me, Al* (see Orrin's review). It is presented in the form of Lorelei's diary, so is entirely in her unique voice, with tortured syntax, creative spelling and unintentionally revealing insight. Lorelei, like Lardner's antihero, is surpassing ignorant of culture and most of the world beyond her particular haunts, but, unlike Jack Keefe who is genuinely unenlightened about himself, she betrays a profound understanding that her looks and her general availability enable her to extract just about anything she wishes from gentlemen. And the most important similarity is that this is just a funny book, certainly one of the funniest ever written by an American author.

Forget Carol Channing and Marilyn Monroe: go to the source

By Jay Dickson

It's impossible to hear this title without thinking of the stage musical with Channing or the later film version of it with Monroe. But Loos's novel is one of the funniest books of the twentieth century, and was beloved by everyone from James Joyce to Santayana. It's all told from Lorelei Lee's diary as she conquers New York, London, Paris, and (hardest of all) the Philadelphia Main Line, entirely by dint of her charm and comeliness. Lorelei is no fool, and exploits the desires of the old men who meet her to get all the jewels and orchids she can dream of, but nonetheless she remains very much an innocent--which is the greatest wellspring of the book's appeal. And her cynical friend Dorothy's sidecomments (which Lorelei frequently quotes) are absolutely hilarious.

Utterly entertaining

By Scott A. Humphries

This is a great little book (actually, two books in one). I laughed put loud throughout it and hoped that it would never end. "Gentlemen Prefer Blondes" is rightly considered a classic, its sharp and biting witty insight is something one never seems to see in a book today (indeed, humour in a book today seems to be

rare - sometimes it seems that all new fiction books are depressing and morbid; and if you feel this way too then you should read Loos' clever and refreshing novels). This is a classic that you will want to read over and over.
