Freida Carson Histology review

By A Customer

I think this is one of the best instructional histology books I have seen. It gives a solid background of the information needed to certify with the board of registry and allows a individual to learn on there own while working in the histo laboratory. This book has helped me to grasp all basis in the subject while keeping it interesting and not dull. I strongly suggest this book along with the instructional workbook for anyone who is starting out in the field of histology. It will be worth your money.

An absolute must for the ASCP exam

By FoodPornDirector

Frieda Carson's book is a must buy for anyone in the field of Histotechnology. I would not say that it is an exhaustive book, but it covers a good amount and gives a good representation of general areas, especially those topics that are covered on the ASCP exam. I often find myself referring to it at work. The book does not really delve too deeply into IHC but does provide a very basic primer on it.

Most Over-rated text in Histotechnology

By R. H. Houston

This is without doubt, the most over-rated histotechnology textbook on the market. The reason for it's success is because it has been pushed by the ASCP and is used for the foundation of the ASCP histotechnology examination (again extremely poor curriculum and examination).

If you really want to understand the science behind histotechnology and not a cook-book format, you must read either John Kiernan's "Histological and Histochemical Methods: Theory and Practice" or John Bancroft's "Theory and Practice of Histological Techniques"
