The LEED AP BD+C credential is intended for the core team members participating the new construction or major renovation of a commercial, institutional, or industrial building project. The individuals who hold this credential are often Architects, Engineers, Developers, or Consultants who want to lead their teams to greater success in delivering sustainable solutions.

The LEED AP BD+C credential is also a good fit for students who are just getting their feet wet in green building, as well as the mid-career professional who is staying up to date with the latest technology and trends in the construction industry. For this reason, if nothing else is a good fit, fall back on the Building Design + Construction path and you will have a solid foundation of green buildings know-how.

This study guide summarizes the most important points of the LEED AP BD+C exam, and will help you memorize important information.

By Sandra

This guide was excellent. The 800 page LEED guidebook is so mind numbingly boring and hard to study but this book really is a better read and explains the concepts better. I used this to study for the AP (BD+C) and passed the first time with a high score. I really recommend it. Also recommend taking the LEED practice exams online.
