An excellent introduction to Kant's philosophy

An excellent, very clear, introduction to Kant's philosophy

Penetrating the labyrinth.

By John C. Landon

Correctly assessing the argument in Kant's first Critique is one of the most difficult exercises in philosophy

and often overly stylized summaries induce illusions of clarity, when the real argument is in the background, almost too arcane to be grasped, and leaving one in the distressing condition of realizing one hasn't understood a thing. This account has to be the best of the lot, attempting without compromises to survey the whole majestic range. Good job.

good, but there are better books on Kant

By Max Hammer aka Larry C.

I bought this book from amazon.com a few years ago while enrolled in German Critical Philosophy--all Kant. Six books. I found Gardner's book--as well as the Routledge Guidebook (RG) on Wittgenstein--to be not as comprehensive as I wanted or needed. For example, the RG series will take some themes and break them down for the reader. While this is good, they weren't linked back up to the overarching themes. Basically, the RG series aren't deep enough or broad enough.

I would not recommend buying this book if you're hoping for a quick fix to understanding CPR. Look for articles on specific topics in Kant Studien, a Kant journal your library should have. Beck and also Kemp Smith have good basic intro books on Kant and CPR. Also check with your professor about who is a prominent Kant scholar and check out books by them. (Henry?) Allison has a really great book on Kant's aesthetics, which is ultimately tied up with the epistemology in CPR.

recent edit: obviously I'm biased to my own review, but this book is not the best general commentary on Kant and CPR, though it may be the easiest to find or come across here on the internet. Dig deeper and you'll be rewarded. Trust me.
