Most helpful customer reviews

0 of 0 people found the following review helpful.

really Kool stufff, not all of it...some....

By scarecrow

this is a nice collection of Riley, I loved having the "keyboard studies" now I can play them; there are other pieces some quite early and later of fixed and questionable interest. Not all that Riley writes is worth a second visit.....but this is the price you pay to be interested in his music in the first place....the post-modern times seems to take away just as much as it provides.....
