THE PROJECT MANAGEMENT HANDBOOK: A GUIDE TO CAPITAL IMPROVEMENTS BY KEVIN P. VIDA PDF

Project managers are needed in many different industries, including computer services, architecture, engineering, local and federal governments, and private industry. And many different kinds of organizations utilize a Capital Improvement Program (CIP). However, very few project managers operating under the auspices of a CIP have any formal technical training or education in project management. These project managers are often thrust into positions in which they have little experience, and they quickly need the necessary information on project management presented in a clear and accessible way. In *The Project Management Handbook*, author Kevin Vida provides a practical, easy-to-understand description of how a CIP project is developed, executed, monitored, and completed.

This book provides a clear and detailed explanation of what steps are required and what roles and responsibilities a project manager must fulfill in executing a CIP project successfully. The chapters are divided into phases, and then progressive tasks, and then steps, so the reader can start at the beginning and develop an understanding of project management under a CIP along the way. The book begins with the basics of project management and CIPs before tracing the life cycle of the CIP project from start to finish. This book is an essential resource for project managers who need to learn the ropes quickly, for students who need information on CIP project management, and for professionals who need a quick and handy reference.

well rounded

By paul

This book allowed insight as to how a construction project is completed from start to finish. It also provides a window into how government makes decisions throughout the process, from capital project planning through construction completion. It details numerous functions that a project manager will perform throughout the life of a project. Furthermore, it provides insight into how design firms and contractors are chosen to perform work. the example project is a fire station that combines many commercial materials along with some specialty items.
